

NSTU, RUSSIA & HSRM, GERMANY

Live & Study in Russia and Germany 2020

International Telecollaborative Project

Together We Can!

We had a course on intercultural communication

We contacted our partners and started discussing our habits and lifestyles

Divided into mixed groups we prepared video presentations on differences between our cultures

We improved our English and communication skills

We celebrated Christmas and learned how Germans do it

“So did we really like it?”

I think everything we did during the project was effective.

Daniil

It was nice to talk to people from another country and all together create some unique ideas for the presentation based on our communication experience.

Daria

It was a useful experience that helped to become more open in conversational practice and helped to understand that students everywhere remain students.

Daria

Most of all I liked to discuss the culture and to make presentations.

Yana
